

Fact sheet - Lean Office Game

This game simulates a typical office organization and shows how the introduction of Lean Office tools improves the processes. This game is a complete package with everything you need to create the great combination of efficient learning and great fun!

What is it?

The Lean Office Game is a complete Lean game you can play with 6-11 participants, to illustrate how Lean Tools can be used to improve efficiency and working environment in administrative organizations.

The simulation is based on a scenario where a group of case officers shall process cases for individual clients. During the game different tools are introduced and the participants will experience how efficiency goes up and stress goes down

What do we learn?

The game illustrates the power of these Lean tools: Cell layout, team organization, single-piece flow, product families and work balancing.

The participants will clearly experience the effect of the individual tools as they are applied during the game.

Can I do it?

Yes ! We have put a huge effort into compiling a package for you that will make it very easy to learn how you facilitate a learning experience with great success. You get everything you need to get started immediately.

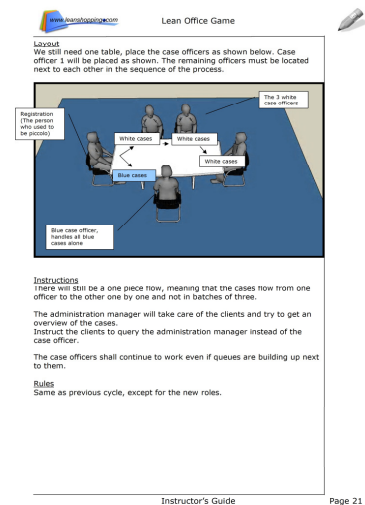

What exactly do I get?

- A comprehensive and easy-to-read Instructor's guide
- A nicely formatted Excel workbook you can use for performance evaluation, and presentation, during the game.
- Besides this you will only need white and blue paper and a stop-watch to play the Lean Office Game

How do I get it?

On our site www.leanshopping.com you can purchase the game.

Visit the website, and learn the power of Lean Office in no time at all without jeopardizing your budget.
